

Links & Location

Links

When you send a link in a message, you will get a preview of the site, and in some cases it can create an interactive attachment, like a youtube video preview or a Spotify mini player.

Location

Before sharing your location (if you are using a browser), you need to give QuikBox Web Chat permission to use your current location.

To share your location, click on the option **Share My Location**, that will send a message with a map preview and a link to Google Maps on your current location
