

Accessing from a Web Browser

eMail Search Web Access Requirements

The following web browsers are officially supported by eMail Search Web Access:

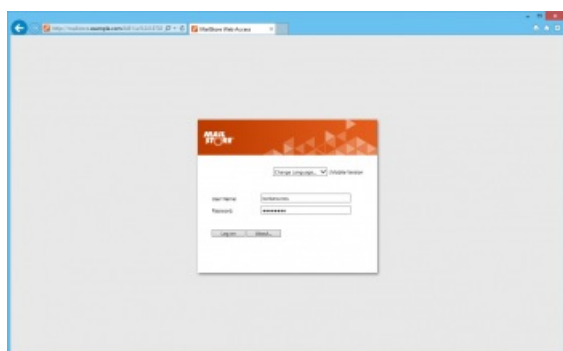

- Apple Safari 3 or higher
- Google Chrome
- Microsoft Internet Explorer 8 or higher
- Mozilla Firefox 3 or higher
- Opera 9 or higher

Accessing eMail Search and Web Access

Unless eMail Search Server was configured differently, users can use the following internet addresses to access eMail Search Web Access:

http://:8461
https://:8462

Please replace with the actual name of the server on which eMail Search Server is installed.

To login to eMail Search Web Access, fill out the *User Name* and *Password* fields and click *Log on*. Please note, that the username must match the eMail Search username of the appropriate user.

Notice: If you are using Active Directory integration with eMail Search Server, the Microsoft Internet Explorer may be able to authenticate users via Single-Sign-On (Login without username and password).
